

# **STOP STATIC CLING**

**Wool, Fur, Silk, Polyester and Rayon...**

**It happens to me when I am racing out the door – my clothes are clinging, or I arrive at my destination to discover that my dress , pants or top is clinging to me – not a good look and no more!**

**Carry your purse size bottle and help a sister out!**

# Static Spray Recipe

**A wee gem to have at hand**

**1 cup of water**

**2 Tablespoons of liquid fabric softener**

**(use a non-scented as some fabric softeners are heavy scented) )**

**1 Spray Bottle**

**or have a couple of smaller size spray bottles (purse size) to make up  
your take anywhere supply**

**Put the water and liquid softener into the spray bottle  
and shake well making sure both ingredients mix  
evenly**

**You now have static spray**

**Spray over your clothes lightly, and use it on your car seats**

As a general rule of use do not spray on 'dry-clean only' items or silk fabrics. If you are not sure, please do the test. Test your materials in an inconspicuous area first, and know this is at your own risk.
